When were axles last serviced: _____

Has unit already been repaired: Yes No

Trailer weight when fully loaded: _____

Describe issue with axles.

Please provide pictures of defect by attaching to email:

(If tire related issue, please let us know which wheel)

Axle Identification Sample

This nine digit number can be found near the center on the rear side of the axle beam on most axles produced after April of 2001. Look for the words DEXTER AXLE and the lot number will be located directly under the name. For easier identification, rubbing a piece of chalk over the number may help bring out the engraving.

Note: all warranty parts should be held for determination.
